

# EU RO Mutual Recognition Technical Requirements Technical Interpretation (MR TI)

MR TI Ref: TI006	Relating to MR Technical Requirements for: <b>FLOW GAUGES/TRANSMITTERS</b> <i>(Version 0.0 adopted on 01 July 2016)</i>	MR TI Version	0.0
		MR TI Status	Released
		MR TI Date of Issue	2017-10-26
		Tier	5
<b>*** Uncontrolled if downloaded or printed ***</b>			

## Background:

In May 2017, a manufacturer submitted a request for clarification (RfC006) for the MR Technical Requirement (MR TR) for '**FLOW GAUGES/TRANSMITTERS**':  
The following question has been made:

- Are flowmeters used for the measurement of fuel consumption within the scope of the TR "Flow gauges/transmitters"?

## EU RO MR Technical Committee Response:

The application limitation at point 1.b in the Technical Requirement (TR) states that the 'fuel consumption monitoring' is out of the scope of the TR. This is not to be read as a limitation for the use of the flow meter on fuel piping systems. It simply clarifies that the fuel consumption monitoring function is not considered in this TR.

Therefore, flowmeters used for the measurement of fuel consumption are considered out of the scope of the EU MR certification.

## MR TI APPROVAL DATE AND REVISION NUMBER
